

Website Administrator's Report for the 2017 Summer Committee Meeting

Some very good things have happened in the Area 20 website world since the last assembly. A few days ago our hosting provider moved our domain to a new server. There was some brief down time causing delays in posting material, but it has been resolved. Hopefully you will notice an improvement in speed. Behind the scenes we'll benefit from more reliability and security.

Alternate website administrator Earl N. has been working with Danny K., webmaster in district 12 and web liaison for the spring conference committee, to construct a new website for this and all future committees. Still in the formative stages it will become the template for all conferences held in Area 20 and will greatly simplify that aspect of future conferences.

I attended the fourth annual National AA Technology Workshop last weekend. It was the best ever, with terrific take-aways and a strong prospect for future growth in service. Of note was the attendance of several GSO servants and a trustee who spoke at the Saturday evening meeting. I will generate a complete report soon, which would be found on the usual Reports and Minutes page of aa-nia.org. One concept I heard there was new to me but seemed so sensible: getting a technology sponsor. Something to think about for those who might want some guidance in that area.

John C.

Area 20 website administrator
