

## Treatment Committee Report for the 2018 Winter Committee Meeting

Hello from your NIA Area Treatment Chair.

Since January 1 2018 this writer has been talking to the Treatment Chair of district 62, who was newly elected, to determine dates and places for a workshop. We are determined to have this workshop before the end of April 2018 and the Treatment Committee would like to have a least one more in another district before the end on 2018.

This writer has read the complete treatment material packet sent to me from GSO and found it interesting and would like to see if in the treatment can money can buy some of those packets for other districts who may want to get a new look on treatment.

I will be going to the Nia Spring Conference and will be there all weekend. The Treatment Committee will be asking for a Panel slot at the NIA Spring Conference and will be attending the assembly that weekend.
