

## Technical Committee Report for the 2018 Winter Committee Meeting

The technical committee, established by vote at the 2017 Fall Committee is to be comprised of the website administrator, the alternate website administrator, a past delegate and three at large members to be appointed by the area chairperson. At this stage we need to identify people interested in filling those three spots. To be considered, please contact Chris or me as soon as possible.

Among its responsibilities the committee is to keep the districts, assembly and area committee informed about technology opportunities and to recommend appropriate solutions. Chris and I agree that one of the first action items is to get the area enrolled in Google for Non-profits and pursue the objectives of shared document storage and creation.

John C.
